Title: Landscape structure as a predictor of taxonomic and functional diversity, vocalization patterns and chytridiomycosis in amphibians in the Atlantic Forest **Aim:** Answer how the structure of the Atlantic Forest Biome landscapes affect: 1) the taxonomic and functional diversity of species; (2) vocalization patterns; and (3) the infection of *Batrachochytrium dendrobatidis* (Bd) at different spatial scales

Title: Effect of Landscape Modifications and Climate Changes on the Persistence of Amphibians in the Atlantic Forest

Aim: (1) to present an assessment of the surveys of the amphibian communities for the Atlantic Forest, their composition and distribution; (2) to investigate how habitat loss and fragmentation on the regional scale can affect the current persistence of amphibians from different reproductive guilds; and (3) to investigate how climate change may affect the future persistence of amphibians of the genus *Brachycephalus*, considered highly sensitive to these climatic changes

Title: Effect of fragmentation on the persistence of anuran amphibians (Amphibia: Anura) within the Atlantic Forest

Aim: (1) model the potential distribution based on the environmental suitability of the species of interest; (2) identify landscapes with high environmental suitability and surveys with high sampling effort in order to characterize the regional anurofauna; and (3) evaluate the relative contribution of landscape indices (percentage of forest cover, connectivity, relief and urban proximity) to the persistence of species using model selection for multiple competing hypotheses based on Akaike information theory

PROFESSIONAL EXPERIENCE

From 2015 to 2016, I was a Research Assistant of Prof. Milton Cezar Ribeiro where I developed statistical and spatial analysis of mammal and ants biodiversity in the Atlantic Forest Biome

2021-2022	Environmental consultant Seleção Natural • Ecological modeling Seleção Natural Piracicaba, SP, Brazil 2020 - 2021 • Ecological corridors • Landscape metrics • LSCorridors • LSMetrics	 Piracicaba, SP, Brazil
2019 2021	Environmental consultant PROECO Ambiental • Species distribution modeling	 Poços de Caldas, MG, Brazil
2018 2019	Environmental consultant Seleção Natural • Ecological data analyst	 Piracicaba, SP, Brazil
2018 2019	Environmental consultant Aquaflora • Species distribution modeling	 Curitiba, PR, Brazil
2018 2019	Environmental consultant Associação de Levantamento Florestal do Amazonas • Shiny App	 Manaus, AM, Brazil
2018 2019	Environmental consultant ECOnecta • SIG specialist • GRASS GIS	 Rio Claro, SP, Brazil
2015 2016	Environmental consultant Geoinform • Herpetology field assistant	 Rio Claro, SP, Brazil

Since 2016, I have worked as an autonomous environmental consultant in the field of geoprocessing, analysis of ecological data, landscape ecology and species distribution modeling

Between 2018 and 2019, I composed a group of analysts to assess the impact of the Fundão dam rupture in Marina/MG (Brazil) on the Rio Doce Basin, where I compiled land cover information and built models for the distribution of terrestrial and aquatic species to several scenarios
