MAURÍCIO VANCINE

Spatial Ecologist and Doctoral Student in Ecology, Evolution and Biodiversity

I am a Spatial Ecologist and PhD student at Unesp Rio Claro, Brazil. I have experience in landscape ecology, effects of habitat loss and fragmentation, amphibian ecology, species distribution modeling, and analysis of ecological and spatial data.

Q SCHOLARSHIP & AWARDS

2020 • Doctoral Graduate Scholarship

Coordination of Superior Level Staff Improvement (Capes) (BRL 118,680.00) São Paulo State University (UNESP)

Grant 88887.513979/2020-00

♀ Rio Claro, SP, Brazil

Title: Landscape structure as a predictor of taxonomic and functional diversity, vocalization patterns and chytridiomycosis in amphibians in the Atlantic Forest **Aim**: Answer how the structure of the Atlantic Forest Biome landscapes affect: 1) the taxonomic and functional diversity of species; (2) vocalization patterns; and (3) the infection of *Batrachochytrium dendrobatides* (Bd) at different spatial scales

Master Graduate Scholarship

Grant #2017/09676-8

Title: Effect of Landscape Modifications and Climate Changes on the Persistence of Amphibians in the Atlantic Forest

Aim: (1) to present an assessment of the surveys of the amphibian communities for the Atlantic Forest, their composition and distribution; (2) to investigate how habitat loss and fragmentation on the regional scale can affect the current persistence of amphibians from different reproductive guilds; and (3) to investigate how climate change may affect the future persistence of amphibians of the genus *Brachycephalus*, considered highly sensitive to these climatic changes

Scientific Initiation Scholarship

Grant #2013/02883-7

Title: Effect of fragmentation on the persistence of anuran amphibians (Amphibia: Anura) within the Atlantic Forest

Aim: (1) model the potential distribution based on the environmental suitability of the species of interest; (2) identify landscapes with high environmental suitability and surveys with high sampling effort in order to characterize the regional anurofauna; and (3) evaluate the relative contribution of landscape indices (percentage of forest cover, connectivity, relief and urban proximity) to the persistence of species using model selection for multiple competing hypotheses based on Akaike information theory

RESEARCH EXPERIENCE

2015 • Research Assistant

São Paulo State University (UNESP)
Spatial Ecology and Conservation Lab (LEEC)

Rio Claro, SP, Brazil

Statistical and spatial analyzes of mammal and ants biodiversity in the Atlantic Forest Biome

• 2000 h

PROFESSIONAL EXPERIENCE

From 2015 to 2016, I was a Research Assistant of Prof. Milton Cezar Ribeiro where I developed statistical and spatial analysis of mammal and ants biodiversity in the Atlantic Forest Biome

2018

2013

2015

2017
