Master Graduate Scholarship
São Paulo Research Foundation (FAPESP) (BRL 16,248.54)   📍 Rio Claro, SP, Brazil
São Paulo State University (UNESP)
Grant #2017/09676-8
Title: Effect of Landscape Modifications and Climate Changes on the Persistence of
Amphibians in the Atlantic Forest
Aim: (1) to present an assessment of the surveys of the amphibian communities for the
Atlantic Forest, their composition and distribution; (2) to investigate how habitat loss and
fragmentation on the regional scale can affect the current persistence of amphibians from
different reproductive guilds; and (3) to investigate how climate change may affect the
future persistence of amphibians of the genus *Brachycephalus*, considered highly sensitive
to these climatic changes

2013
|
2015

Scientific Initiation Scholarship
São Paulo Research Foundation (FAPESP) (BRL 10,539.87)   📍 Rio Claro, SP, Brazil
São Paulo State University (UNESP)
Grant #2013/02883-7
Title: Effect of fragmentation on the persistence of anuran amphibians (Amphibia: Anura)
within the Atlantic Forest
Aim: (1) model the potential distribution based on the environmental suitability of the
species of interest; (2) identify landscapes with high environmental suitability and surveys
with high sampling effort in order to characterize the regional anurofauna; and (3) evaluate
the relative contribution of landscape indices (percentage of forest cover, connectivity,
relief and urban proximity) to the persistence of species using model selection for multiple
competing hypotheses based on Akaike information theory

📍 Rio Claro, SP, Brazil

Between 2018 and 2019, I composed a group of analysts to assess the impact of the Fundão dam rupture in Marina/MG (Brazil) on the Rio Doce Basin, where I compiled land cover information and built models for the distribution of terrestrial and aquatic species to several scenarios

Since my formation I develop teaching activities, initially as a monitor. From the master's degree, I help and minister undergraduate and graduate courses, especially those related to Space Ecology, Species Distribution Models, Statistical Models in Ecology and Geoprocessing.
